

Litteratur- och referenslista

Specialistutbildning i Veterinär folkhälsa

Denna litteratur- och referenslista är en allmän riktlinje för att hjälpa dig som aspirant med dina studier under utbildningen, under det självständiga arbetet och inför examinationen. Det är inte en uttömmande lista över referenser, utan du behöver själv hålla dig uppdaterad och reflektera över den senaste vetenskapliga och juridiska utvecklingen inom området. De vetenskapliga artiklarna som anges är nyckelreferenser eller sammanfattningar av forskningsläget (review). Utöver dessa förväntas du självständigt söka aktuella artiklar.

Som aspirant uppmanas du att fokusera på "den stora bilden" och länka samman olika delar av kunskapen i ett One Health-perspektiv och sätta den i ett nationellt, europeiskt och globalt sammanhang.

Listan ger exempel, det betyder inte att du måste läsa allt, eller just dessa. Inom de valda fördjupningsområdena behöver du även själv leta mer litteratur.

Efter varje referens anges vilka utbildningsområden som berörs:

- 1) Epidemiologi och riskanalys
- 2) Smittskydd och hygien
- 3) Författningskunskap
- 4) Mikrobiologiska faror
- 5) Kemiska och fysikaliska faror
- 6) Djur
- 7) Livsmedel
- 8) Vatten och miljö
- 9) Global utveckling
